BACHELOR'S DEGREE

UNIVERSITÀ
DEGLI STUDI DELLA
TUSCIA

The Bachelor degree course in Biological Sciences aims to train young graduates with an appropriate basic preparation in the **different area of Biology** and equipped with operational and applicative skills in the biological field.

The training course and the sequence of given teachings have been designed to guarantee the student the full, integrated and progressive acquisition of skills aimed at **understanding biological phenomena** at increasing complexity levels.

The specific objectives of the course, while having in mind the skills required by a possible insertion in professional activities at the end of the three-year course, are mainly formulated in sight of acquiring further university training.

The training course includes three different areas of learning within which the subjects of the study plan:

Non-biological discipline area

Biological discipline area

In-depth biological discipline area

These areas contribute sequentially and together to the achievement of the specific training objectives of the study course, thus allowing students to acquire a modern and in-depth knowledge of life sciences.

L-13

Biological Sciences

Years: 3
ECTS: 180
