LANDSCAPE ARCHITECTURE
MASTER'S DEGREE

The Master Degree in Landscape Architecture is the second level of the Sapienza-Tuscia joint university project for the training of landscape architects and designers who operate with cultural, technical and methodological tools, at all levels of intervention and in different contexts, on sites of excellence as well as in everyday life contexts and sites.

Graduates are competent in the analysis, design, planning and management of parks, gardens, and open spaces both public and private. They intervene in the conservation, restoration and redevelopment of parks, gardens and historical landscapes; in the drafting of landscape plans; in the requalification of the landscape in abandoned and degraded areas; in the prevention of environmental risk; in the landscape insertion of infrastructural networks, in the analysis and evaluation of environmental impact studies; in the rural and forest landscape, in agricultural production and in rural tourism.

The Landscape Designer, in achieving her/his professional scope to improve the quality of environment and the territory, applies and performs the wide range of knowledge, skills, abilities and competence acquired with an interdisciplinary approach; they integrate their specific design knowledge with biological, forestry and urban agriculture, plant defense and earth science competence.

Humanities, social and geographical science contribute to the integration between society and landscape.

The Joint Degree Course teaching center is at the Faculty of Architecture of Sapienza University of Rome.
