MOUNTAIN SCIENCE

BACHELOR'S DEGREE

UNIVERSITÀ
DEGLI STUDI DELLA
TUSCIA

The Bachelor's Degree Course in Mountain Sciences, unique in Italy with this denomination, aims to train a bachelor's graduate with professional skills in **analysis, projection, and management of mountain areas and their resources**, with particular reference to the Apennine and Mediterranean environments. The training program aims to train an expert capable of **identifying and preventing the risks of environmental degradation** while proposing **sustainable solutions for forest conservation and valorizing hilly and mountain agriculture** and related products, as well as valorizing the possibilities connected to green tourism.

The graduate acquires skills for the **recovery of geographical and socio-economic marginalities** of mountain environments with a marked naturalistic and recreational value through the ability to **plan and design parks and protected areas**; he acquires skills that allow him to get various and fulfilling roles such as **mountain agronomist**, expert in **biodiversity conservation**, expert in **forest engineering**, and expert in the **economic enhancement of mountain territories**.

Mountain Sciences is a professional course characterized by a **practical-application approach** that makes the graduate ready to promptly enter the job market, and, at the same time, it allows for the acquisition of a solid foundation to continue the studies in master's and specialized master's courses.
