TUSCIA**

ARCHEOLOGIA E STORIA DELL'ARTE, TUTELA E VALORIZZAZIONE

MASTER'S DEGREE

Our MA programme aims to provide students with a solid preparation in the fields of Archaeology and Art History through an innovative interdisciplinary teaching approach across a range of related subjects (Art History, Etruscology, Modern and Contemporary Architecture, Numismatics, Pre-/Protohistory, and Topography, among others). Students' preparation is developed with the acquisition of specific skills and competence for the preservation, management, promotion and enhancement of the archaeological, historic and artistic heritage.

This programme offers 2 pathways:

- Archaeology (LM2);
- Art History (LM89).

With both pathways, students will have access to specialist laboratories to support their studies and will participate in fieldwork and archaeological research, with additional study visits to archaeological sites, museums and art galleries.

To access this, and any other MA programme, students must have completed a 3-year university degree programme ('laurea' or 'diploma universitario') prior to admission. If issued abroad, any 3-year Bachelor's degree must comply with the current Italian admission regulations.

The admission is subject to specific curricular requirements and a non-selective oral interview may be necessary for the assessment of applicants' preparation.

This programme also enables graduates to proceed to postgraduate studies and PhD programmes.
