EDUCATIONAL SCIENCE

THREE YEARS - DEGREE

UNIVERSITÀ
DEGLI STUDI DELLA
TUSCIA

The degree course in Educational Sciences completes the Unitus educational offer in the area of educational disciplines and training, making use of the scientific and cultural contribution of the Roma Tre University.

The course aims to train two professional profiles:

- Educator of nursery and childcare services, for the 0-6 year age group (nurseries and micro-nurseries; spring sections; play spaces, centers for children and families; educational services in home contexts; playrooms; intercultural centers, baby spaces, independent family nurseries, family homes, residential or domiciliary contexts);

- Professional socio-pedagogical educator, for structures that manage social and socio-educational services (residential, domiciliary, territorial) for families, elderly people, minors, subjects detained in prisons, foreigners, nomads and cultural, recreational and sports services (youth centers, libraries, media libraries, toy libraries, museums, etc.), as well as environmental education services (parks, eco-museums, environmental agencies).

The disciplinary teaching activities will be integrated with in-person workshops and compulsory external internship activities at the local socio-educational services, especially in nursery schools and childcare services.

An important objective of the degree course is to provide graduates with a critical and planning culture, which is increasingly necessary to deal with highly complex educational and training processes
