SECURITY AND HUMAN RIGHTS

Master's Degree

The Master's Degree Programme, entirely delivered in English, offers an educational path in which the traditional dichotomy security vs freedom is revisited in light of three main contemporary challenges: **migration**, **technology** and **sustainability**.

The aim of the Programme is to provide students with the multidisciplinary competences they need to disentangle complex phenomena and to work in strategic fields and high-level innovation sectors, such as migration and border security, new technologies, privacy and data protection, green economy and politics of sustainability.

The **first year** is aimed at acquiring basic knowledge relating to the problem of security.

The **second year** includes two alternative paths or sets of courses with a higher level of specialization.

The first path (***Security and Human Mobility***) is dedicated to migratory processes, with two semesters concerning: i) the external security of borders and the management of migratory flows in the Euro-Mediterranean area (The External Dimension); ii) the internal security and the processes of legal, economic and cultural integration of immigrants (The Internal Dimension).

The second path (***Security, Technology and Sustainability***) provides skills related to the new challenges that the use of technology poses for fundamental rights, with two semesters concerning: I) Privacy and Data Protection; II) Green Security.

Students can take all courses online (at distance) or in presence. Scholarships and study grants will be provided for international and Italian students.
