Exploring Marine Biodiversity in Turkey: From Benthic Invertebrates to Colonial Hydrozoans

Dr. **Sera Övgü Kabadayi Yildirim** is an Assistant Professor at *Isparta University of Applied Sciences*, Türkiye.

Her PhD research focused on the diversity and ecology of Hydrozoa in the Gulf of Antalya. Her areas of expertise include **marine macrobenthic invertebrates**, with a particular interest in sessile and colonial species.

She is involved in biodiversity assessments and species identification studies along the Turkish coasts, combining both field observations and laboratory analysis.
