Accept the privacy policy and click on "LOGIN"

Low-coercion voting model

What it means?

You can vote each ballot as many times as you like. The vote considered valid will be the last one cast in time order.

Why is it used?

With this model, it becomes very difficult for a third party actor to be able to influence votes by not having actual evidence of voter's expression of vote.

UNDERSTOOD

For these elections, low coercion is enabled.

Read the information about it and click on “Understood” to proceed.
