

CORRIGENDUM**Ph.D. Program in "Engineering for Energy and Environment", 42nd Cycle**

Subject: Rectification of the pool of participants eligible for the unfunded Ph.D. position with a targeted research topic proposed by CREA-IT.

Please be advised that, following clarifications received from the funding/partnering institution CREA-IT, the information sheet for the Ph.D. course in "Engineering for Energy and Environment," published as an attachment to the Selection Call, is amended as specified below:

Details of the modification

- **Course Sheet – Section: N)** "No. 2 positions without scholarship"
- **Curriculum:** "Biosystems and Environment"

Research Topic: " Agentic AI applications in agriculture and forestry" (funded by CREA-IT).

Amended text

- **WHERE IT READS:**

The unfunded position regarding the topic " Agentic AI applications in agriculture and forestry" is reserved for CREA-IT employees.

- **IT SHOULD READ INSTEAD:**

The position on the topic "Applications of agentic AI in the agricultural and forestry sector" is not exclusively reserved for CREA-IT employees, but is open to all applicants who meet the admission requirements outlined in the call.

Operational notes for candidates

- Without prejudice to all other provisions and requirements indicated in the selection call and its attached information sheets, applications for the aforementioned position will be evaluated according to the standard criteria specified in the Ph.D. course sheet (Evaluation of candidates).
- The deadlines for submitting applications for admission remain unchanged.

Date: August 3, 2026
